About This Game

DESCRIPTION

Have you ever invented your own worlds? Perhaps you managed to think out one of them so well that you literally immersed in it? Sometimes, when the soul is badly bad, you just want to take it and find yourself in a fantasy world where everything is fine, but there are no problems. But ... But suppose that in this world, you have terrible consequences for him, carrying a part of your problems into your own fragile world.

And now, now your world is bursting at the seams because of you, and you are simply stuck in it.

The game is a three-dimensional platformer-puzzle with elements of horror and parkour. The visual part of the game is made in the style of geometric surrealism.

Cute little catch and throw simulator.

You basically catch little babies, puppies, little cats and fledglings, then you have to throw them to some secure play... yeah it does not make a lot of sense and it is a weird idea overall. But hey, it makes fun to catch stuff and to throw it. That's how we guys are made. Just imagine it like catching a ball and then you have to throw it in a net. That's all. Here you get some more variation in levels and difficulty.

I had fun with the game I got in a cheap bundle and therefore I am more than happy that it is not one of those trash games - actually I was expecting it, but it is neat, ironed out arcade VR game. Good for some VR session with the family, the girlfriend - catch the baby - hahaha - or whatever. Sure don't play it with your buddies.

RECOMMENDED ON SALE OR IN A BUNDLE.

I grew up with the Nancy Drew games and it's hard for me to evaluate how much you would enjoy their brand of cheesy point-and-click fun without the heavy nostalgia layer, but I have a great time with every one of these things. Especially this one, where everyone openly hates their murdered friend and an entire high school conveniently has the only four students you need to solve the mystery hanging out where you can talk to them, and nobody else is there, not even staff.. What did I just play? Seriously... No...

[1/10. quot;Can't talk now. I'm busy winding rope around blocks of dudes in yoga poses so's I can paints 'em."](#)

[I'm not sure what kind of mess someone was smoking to come up with a game like this, but the concept is simple and unique and frighteningly addictive. There's no time limit or anything, so you can sit and relax while you play. Very glad I was gifted the indie pack that included this game.](#)

[Make sure you get to the Tree of Nostalgia for some gamer lols. =D. i love it its funny lol poo poo doo doo xD. Cheap. can be challenging and fun.. got alot of routes with alot of scenarios but do not have but 1 scenario I can play on this route. not sure why its like that for me.. I like the route I operated and wish I could do more scenarios on it.. Definetly one of the most remarkable strategy games, even nowadays it is one and only. Single player alone is quite easy and short, but thanks to some missions mods game gains a lot more content. Multiplayer is a great coop joy. Definetly worth picking it for such a price. Still waiting for a proper sequel.](#)

the little miners just keep looking for iron that's right in front of them. pretty huge oversight in the development process.. This isn't really a full review, I simply lost interest due to an underwhelming first few minutes.

Level and enemy design is bland. The upgrade system seems very imbalanced and poorly thought out. I am kind of tempted to replay to try to see what sort of boss battles there are later, but I can't force myself to slog through to find out if there are any good parts.. Cool uniforms, and decent loadouts.. While still very rough, even in this current state the game is FAR more enjoyable than most gladiator stable sims.

Pros:

Ability to either control combat or just watch

Lots of upgrades

Ability to rename gladiators

Cons:

Not balanced (seriously, try playing with Melee glads if you want a "challenge:)

The fershlugginer spectator camera centers on the your guys instead of showing both them and the opponent.

The options are not all that varied.

Very repetitive.

Little to no combat animation.

. Have been wanting something like this for ages. Works flawlessly with everything I've tried.. I hate my life.. A very fun building game which is fairly easy to learn.. The main game (M&M:HVII) is not worth playing due to the anti-piracy measures of Ubisoft. The HD version of Heroes III plays just fine though, strangely enough. However is much cheaper to buy Heroes III all by itself.. Oh yes, it's totally worth 1.50\$. So simple a game to learn, but the optional objectives really bring out the strategy. Can't wait to try online.. Poogie Behemoth, why not?
